MILE 03

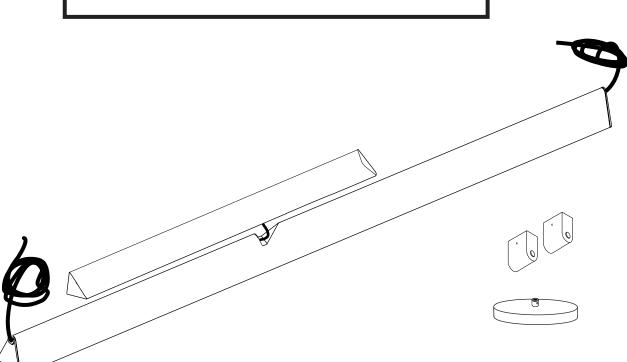

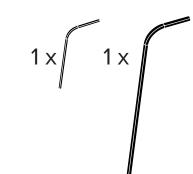

- Use appropriate screws and anchors where necessary
- Wear enclosed gloves when handling lamp
- Handle materials with care. Please consult lamp maintenance sheet on our web site
- Should be used exclusively as a lamp and not as a shelving, display or hanging unit

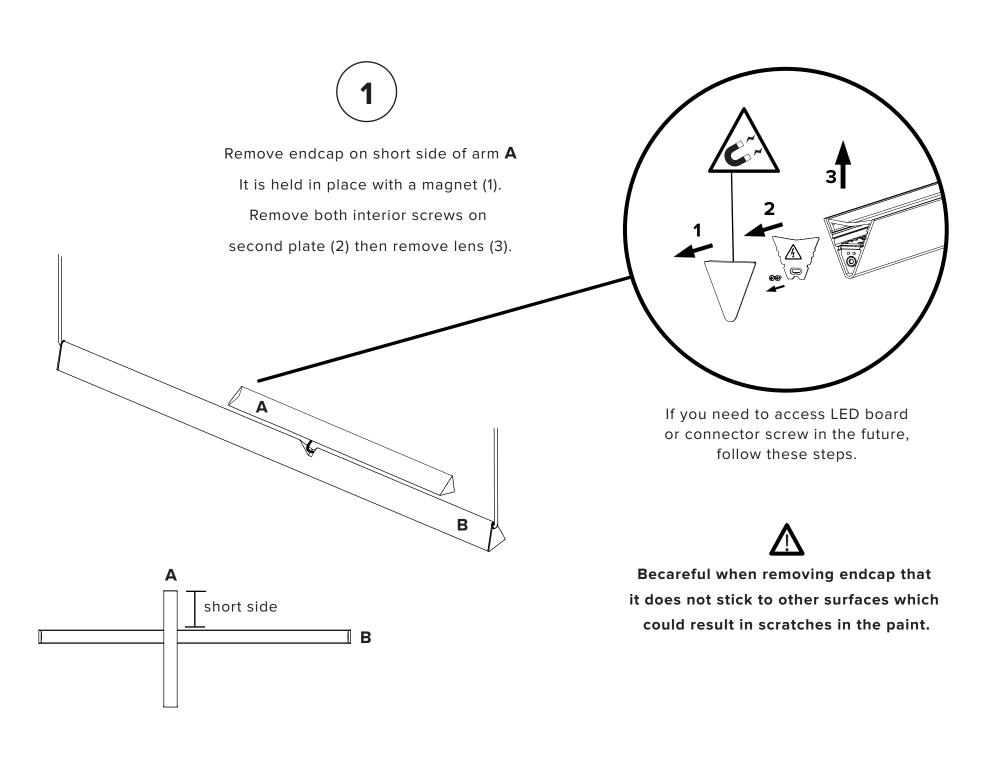

lamp weight 6 lbs.

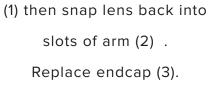

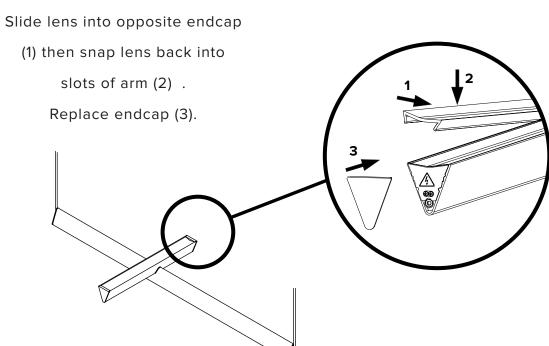

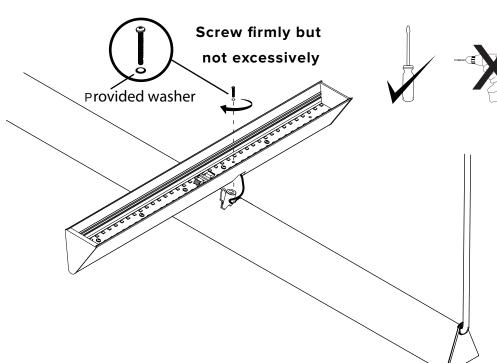

Reorientate arm **A** into the slot in arm **B**. Screw it into place with screw provided. Make sure the wire connection is not in the way

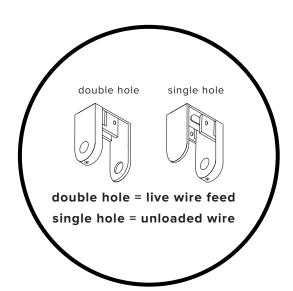

Mount live wire feed first.

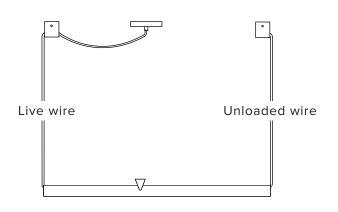

Be sure all ceiling holes are parallel.

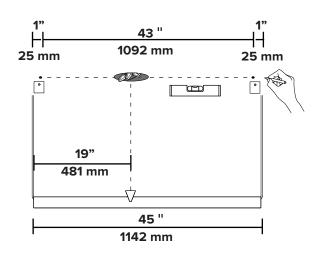

Mount lamp with uplight aligned with junction box if desired.

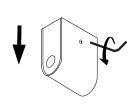

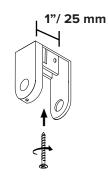

Make sure to use appropriate anchors for ceiling material

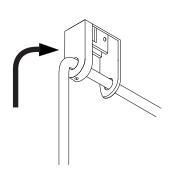

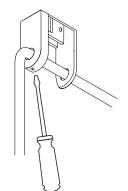

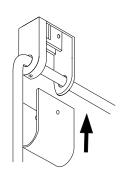

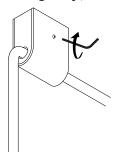

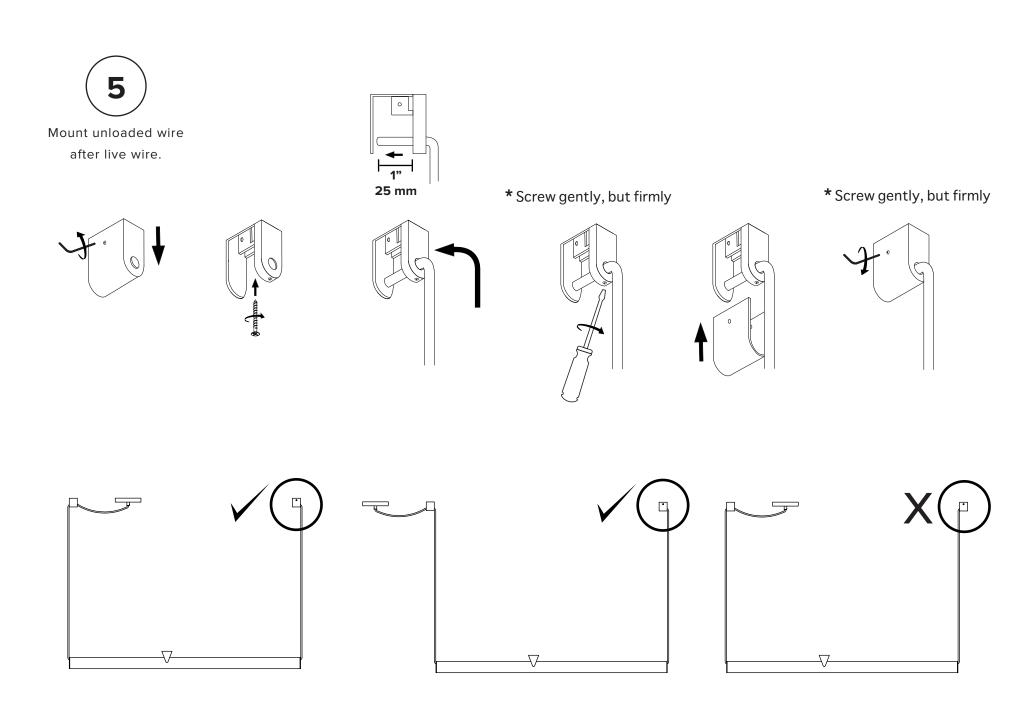

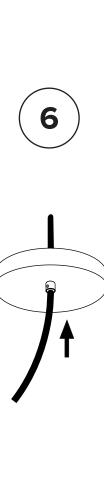

* Screw gently, but firmly

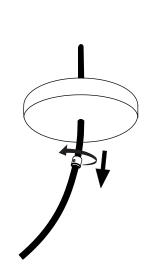

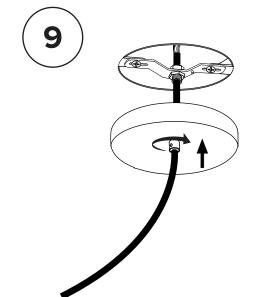

Pass wire

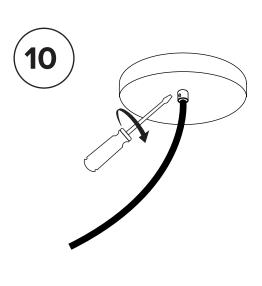

through canopy

Unscrew and lower

canopy strain relief

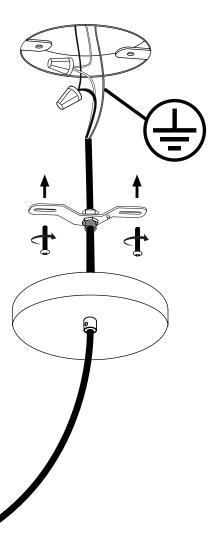

Make connection

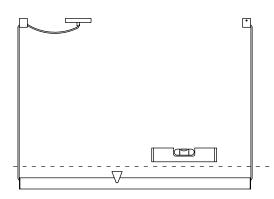

(green to green) (brown to brown) (blue to blue)

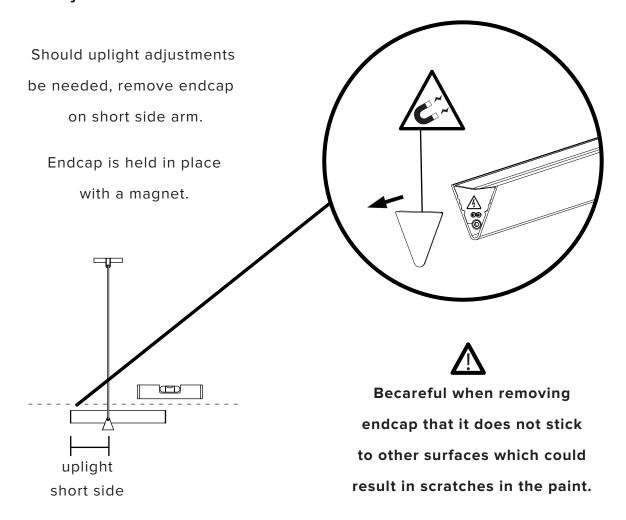

Adjust balance of downlight by adjusting length of wires if necessary.

Adjust balance of uplight by adjusting inner balance if necessary.

Before adjusting wire length or interior weight, carefully attempt to balance the lamp by hand. The wire's flex can allow micro adjustments of their own.

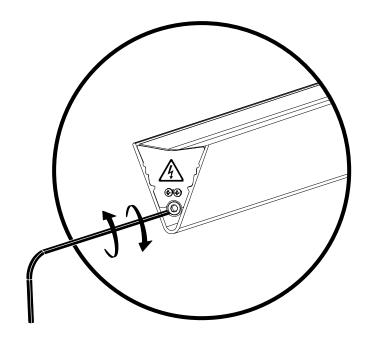

The adjustment screw holding the balance weight is now visible.

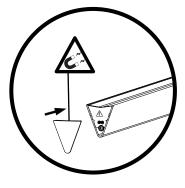

Use supplied allen key to screw weight in or out depending on balance.

Note that the endcap affects final balance of lamp!

Lamp will not appear balanced until the cap is in place.

Replace endcap
when adjustments
are complete
