WALDORF SUSPENSION DOUBLE

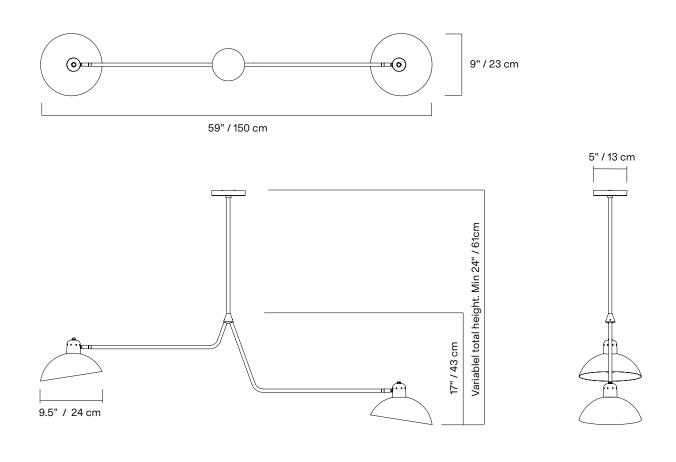

The main feature of the Waldorf Collection combines an open hemispherical shade with a cylindrical socket cover. This composite shade is deployed in suspension and wall-mounted configurations with natural brass and powder coated rods. Swivelling shades and other moving parts add functional flexibility to the crisp, streamlined forms of this collection.

*Other dimmers can yield good results and we recommend conducting your own test before final installation.

Some dimmers require a minimum load, check specifications.

*Other dimmers that specify LED lamp compatibility may operate without issue.

We recommend conducting your own test before final installation.

**Leading edge is also known as TRIAC or Forward Phase.

Trailing edge is also known as ELV or Reverse Phase.
